Title: Procurement Policy and Procedures
Number: POL500-003
Approval: Board of Directors
Approval Date: August 20, 2019
Effective Date: August 20, 2019

Reference:
California Public Contract Code (PCC) Sections 1100 – 9203 and Section 20100

Supersedence:
This policy supersedes all previous procurement procedures or standards, including District Procedure 8 Evaluation and Selection of Consultants.

Purpose/Background:
The purpose of this policy is to establish guidelines for the solicitation and selection of all purchases and procurement contracts entered into by Soquel Creek Water District (SqCWD). The California Constitution requires that public resources be used solely to serve the needs of an agency’s constituents. The procedures set forth in this document are designed to assure customers that the District is receiving maximum value for each dollar spent, to clearly define the purchasing authority of District staff, to ensure compliance with federal procurement standards applicable to projects receiving federal grants, and to maintain the fiscal integrity of the District’s annual audited financial statements.

Any exceptions to this policy must be approved by the Board of Directors. The Board of Directors may, by majority vote and in accordance with its fiduciary responsibilities, approve expenditures in any amount and for any length of term that are not otherwise inconsistent with any applicable law or contract.
Sections:

1. GENERAL PROCUREMENT STANDARDS
   A. Code of Conduct
   B. Fair Competition
   C. Solicitation Procedures
   D. Environmentally Preferable Purchasing Guidelines

2. PURCHASING CYCLE
   A. New Vendor Procedure
   B. Purchasing Authority
   C. Purchase Requisitions/Orders
   D. Invoice Processing
   E. Expense Reimbursement
   F. Payment Methods
   G. Petty Cash

3. PROCUREMENT METHODS
   A. Micro-Purchases
   B. Small Purchases
   C. Sealed Bids
   D. Competitive Proposals
   E. Noncompetitive Negotiation
   F. Time and Materials Contracts
   G. Contract Cost and Price
   H. Contract Change Orders

4. CONTRACTING
   A. General Services
   B. Professional Services
   C. Public Works Projects
   D. Alternative Project Delivery Methods

5. FEDERAL FUNDING REQUIREMENTS
   A. Contract Provisions
   B. Federal Awarding Agency or Pass-Through Entity Review
   C. Contracting with Small and Minority Business, Women’s Business Enterprises, and Labor Surplus Area Firms

APPENDIX A – Organizational Conflict of Interest Policy for Design-Build Projects
GENERAL PROCUREMENT STANDARDS

Code of Conduct (CFR §200.318[c]):

The purpose of the Code of Conduct is to give guidance to District staff so that they may conduct themselves in a manner that will be compatible with the best interests of SqCWD and maintain compliance with California Government Code §1090, et seq. As representatives of the District, all employees are expected to conduct themselves in a professional and ethical manner, maintaining high standards of integrity and the use of good judgment. Employees are expected to be principled in their business interactions and act in good faith with individuals both inside and outside the District.

The following Code of Conduct shall govern the performance, behavior and actions of the District, including employees, appointed or elected officials, volunteers, consultants, or agents (collectively referred to as "District staff") who are engaged in any aspect of procurement, including, but not limited to, purchasing goods and services, awarding contracts and grants, and the administration and supervision of contracts or subcontracts:

- No employee, appointed or elected official, volunteer, consultant, or agent of the District shall participate in the selection, award, or administration of a contract if a conflict of interest exists under applicable law. The General Manager, at his/her sole discretion, may also require any employee, official, volunteer, consultant or agent of the District to refrain from participation in the selection, award, or administration of a contract to avoid the appearance of conflict of interest.

- A conflict would arise if the employee, a Board member, any member of his or her immediate family, his or her partner or partner’s immediate family, or an organization which employs or is about to employ any of the parties indicated herein, has a real or apparent financial or other interest in, or receives tangible personal benefit from, the firm selected for an award. It is imperative that the employee disclose to the General Manager as soon as possible the existence of any actual or potential conflict of interest so that safeguards can be established to protect all parties. (Immediate family members are defined as a spouse, domestic partner, legal guardian, son, daughter, mother, father, sister, brother, grandparents, or grandchild. Adopted, half, and step members are also included in immediate family).

- No employee, appointed or elected official, volunteer, consultant, or agent of the District shall do business with, award contracts to, or show favoritism toward a member of his or her immediate family, his or her partner or partner’s immediate family, or to any company, vendor, contractor, or parties to subcontractors who either employ or has any relationship to a family member; or award a contract or bid which violates the spirit or intent of federal, state and local procurement laws and policies established to maximize free and open competition among qualified vendors.

- District staff may not solicit, accept or agree to accept any gratuity for themselves, their immediate families or others that would or could result in personal gain. Personal gain may result not only in cases where an employee or immediate family member has a significant interest in a firm, or subcontractor or a firm, with which the District does business but also when an employee or immediate family member receives any gift or special consideration.
as a result of any transaction or business dealings involving SqCWD. The following items are not considered gratuities:

- Discounts or concessions routinely available to the general public
- Items less than twenty-five dollars ($25) that are turned over to the District for general District use
- Inexpensive advertising items bearing the name of the vendor, such as pens, cups, candy, calendars, etc that have a monetary value of less than twenty-five dollars ($25)

- Disciplinary actions, up to and including termination for cause, will apply to any violation of these conflict of interest standards, in accordance with District policy, and/or, as applicable, a collective bargaining agreement, employment contract, or contract for services.

**Fair Competition (CFR §200.319):**

District staff must discharge their duties impartially to assure fair competition among responsible vendors. All vendors will be treated equally and fairly at all times by all District staff, with equal information given to each vendor who participates in the procurement process. Prequalified lists of persons or firms, or products used in acquiring goods or services, are to be kept current and include enough qualified sources to ensure maximum open and fair competition.

- District staff may not place unreasonable restrictions on competition, including any of the following:
  - Placing unreasonable requirements on vendors to qualify for a procurement
  - Requiring unnecessary experience and bonding
  - Noncompetitive pricing practices between vendors or affiliated companies
  - Awarding noncompetitive contracts to consultants that are on retainer contracts
  - Organizational conflicts of interest
  - Specifying a brand name product instead of allowing an equal product to be offered (brand names may be specified in instances where no grant funding is applicable to the project as long as the procurement remains competitive)
  - Non-compliance with sole source restrictions
  - Precluding potential bidders from qualifying during the solicitation
  - Any arbitrary action in the procurement process

- District staff shall ensure that any vendor that develops or drafts specifications, requirements, statements of work, invitation for bids, requests for qualifications, or requests for proposals for a procurement is excluded from competing in that procurement.

- Procurements shall be conducted in a manner that prohibits the use of statutorily or administratively imposed state or local geographical preferences in the evaluation of bids or proposals, except in those cases where applicable federal statutes expressly mandate or encourage geographic preference. Nothing in this section preempts state licensing laws. When contracting for architectural and engineering (A/E) services, geographic location may be a selection criterion provided its application leaves an appropriate number of qualified firms, given the nature and size of the project, to compete for the contract.
• All solicitations will incorporate a clear and accurate description of the technical requirements for the material, product, or service to be procured. Such description must not, in competitive procurements, contain features which unduly restrict competition. The description may include a statement of the qualitative nature of the material, product or service to be procured and, when necessary, must set forth those minimum essential characteristics and standard to which it must conform if it is to satisfy its intended use. Detailed product specifications should be avoided if at all possible. When it is impractical or uneconomical to make a clear and accurate description of the technical requirements, a brand name or equivalent description may be used as a means to define the performance or other relevant requirements of procurement. The specific features of the named brand which must be met by offers must be clearly stated.

• Bids and proposals shall identify all the requirements which the offerors must fulfill and all other factors to be used in evaluating bids or proposals.

Solicitation Procedures (CFR §200.318[d-i]):

The District has established written procurement procedures to provide oversight over the conservative utilization of resources, including federal funds.

• Acquisition of unnecessary or duplicative items must be avoided. Consideration should be given to consolidating or dividing procurements to obtain a more economical purchase. When appropriate, an analysis will be made of lease versus purchase alternatives, and any other appropriate analysis to determine the most economical approach.

• To foster greater economy and efficiency, and in accordance with efforts to promote cost-effective use of shared services, the District shall enter into state and local intergovernmental agreements or inter-entity agreements where appropriate for procurement or use of common or shared goods and services.

• Encourage the procurement of federal excess and surplus property in lieu of purchasing new equipment and property whenever such use is feasible and reduces project costs.

• Value engineering clauses may be used in contracts for construction projects of sufficient size to offer reasonable opportunities for cost reductions. Value engineering is a systematic and creative analysis of each contract item or task to ensure that its essential function is provided at the overall lower cost.

• Contracts shall only be awarded to responsible contractors possessing the ability to perform successfully under the terms and conditions of a proposed procurement. Consideration will be given to such matters as contractor integrity, compliance with public policy, record of past performance, and financial and technical resources.

• Records will be maintained sufficient to detail the history of the procurement. These records will include, but are not necessarily limited to, the following: rationale for the method of procurement, selection of contract type, contractor selection or rejection, and the basis for the contract price. The Board Clerk will be the repository for said records which shall be maintained according to the District’s written record retention schedule.
• The District alone will be responsible, in accordance with good administrative practice and sound business judgment, for the settlement of all contractual and administrative issues arising out of procurements. These issues include, but are not limited to, source evaluation, protests, disputes, and claims. These standards do not relieve the District of any contractual responsibilities under its contracts. A federal awarding agency will not substitute its judgment for that of the District unless the matter is primarily a federal concern. Violations of law will be referred to the local, state, or federal authority having proper jurisdiction.

Environmentally Preferable Purchasing Guidelines:

Soquel Creek Water District was certified as a Green Business by the Monterey Bay Area Green Business Program in 2017. The District is committed to the conservation of environmental resources and will support, whenever practical and possible, the purchase of recycled and environmentally preferable products. The following guidelines were adopted as a requirement of Monterey Bay Area Green Business certification and to conserve natural resources, minimize environmental impacts, reduce hazards to workers and our community, and reduce materials going to the landfill.

Reducing Waste at the Source
1. Purchase durable, reusable or refillable products whenever feasible.
2. Print multi-page documents on both sides. Set your printer default for double-sided.
3. Avoid polystyrene (Styrofoam) products for the kitchen and shipping departments.
4. Use pitchers to provide water. Avoid purchase of single-serving plastic water bottles for use by staff or guests.
5. Purchase remanufactured or used products when feasible.
6. Reduce packaging. Reusable, recyclable or compostable packaging is preferred.

Buying Recycled Content Products
1. Office paper and envelopes shall contain at least 30% recycled content.
2. Janitorial (restroom & kitchen) paper towels shall contain at least 40% recycled content and tissues and toilet paper with a minimum of 20% recycled content.
3. Request that printing vendors use recycled content paper.
4. In the break room, purchase reusable flatware, or disposable plastic-ware with bioware or use reusable utensils, plates and cups.

Saving Energy, Water, and other Natural Resources
1. Use efficient interior lighting, indoors and out – At least as efficient as T-8 fluorescent bulbs for overhead lighting, and compact fluorescent bulbs (CFL) for task lighting. Consider LED lighting for even greater efficiency.
3. Purchase water-saving toilets (1.28 gallons/flush), hand wash faucet aerators (0.5 gallons per minute) commercial dish rinse nozzles (1.6 gpm) and shower heads (2.0 gpm).
4. Purchase wood products (lumber and paper) with Forest Stewardship Council certification.
5. Purchase bio-based products - products made from plant-based material. Look for paper, bags, food & beverage containers, and cutlery that are biodegradable and compostable. Products from non-wood, bio-based sources are preferred.
Avoiding Toxics
1. Purchase safer cleaning products including those that bear logos such as Green Seal, EcoLogo or Design for the Environment, or receive a high rating on www.goodguide.com.
2. Use only non-aerosol containers.
3. Avoid added antibacterial agents such as triclosan in hand, dish and general cleaners.
4. If contracting with a pest control service, specify Integrated Pest Management or choose a contractor that is certified in IPM, such as those listed at www.EcoWiseCertified.com.
5. When maintaining the building, use products with low or no volatile organic compounds (VOCs), and low or no formaldehyde. Example products include paint, carpeting, adhesives, furniture and window components.

Contracting for Services
Where possible and appropriate, consider using businesses certified or accredited by a 3rd party environmental certification program such as the Monterey Bay Area Green Business Program, Monterey Bay Friendly Landscaping, EcoWise and Build It Green.

Green Building
Building and renovations shall follow Green Building Practices for design, construction, and operation, where appropriate, as described in the LEED™ Rating System.

Where possible and appropriate, try to use reclaimed building materials.

When determining whether a product is environmentally preferable the following environmental attributes should be considered:

- Biodegradable
- Carcinogen-free
- Chlorofluorocarbon (CFC)-free
- Compostable
- Carbon Neutral
- Durable
- Energy efficient
- Heavy metal free (e.g., no lead, mercury, cadmium)
- Less hazardous
- Locally manufactured
- Low volatile organic compound (VOC) content
- Low-toxicity
- Made from rapidly renewable materials
- Recyclable
- Recycled content
- Reduced greenhouse gas emissions
- Reduced packaging
- Refurbished
- Resource efficiency
- Reusable
- Upgradeable
- Water efficient
PURCHASING CYCLE

New Vendor Procedure:

- Before making purchases by any method, other than Petty Cash, the vendor needs to be approved and set up in the District's financial software. New vendors must fill out, sign, and submit an IRS W9 Request for Taxpayer Identification Number form and provide complete vendor contact information, including an email address for the party responsible for receiving purchase orders or invoices.

- The District’s standard payment terms are Net 30, meaning a check must be issued to the vendor no more than thirty days after the invoice date. In specific instances the District and vendor may have agreed to alternate terms and payment must be made within those terms to receive a discount. It is important for the District’s credit profile that all invoices are approved and entered in a timely manner and paid within agreed upon terms.

- All requests for credit applications or credit references must be referred to the Finance and Business Services Department.

Purchasing Authority:

The following purchase authority thresholds apply for all expenditures approved in the fiscal year budget. Any expenditures which are not budgeted must be approved by the Board of Directors.

<table>
<thead>
<tr>
<th>Less than $9,000</th>
<th>$9,001 to $25,000</th>

Purchase Requisitions/Orders:

The purpose of a purchase requisition is to obtain written authorization before the purchase is made or work commences on a project. Purchases over $9,000 made without a purchase order are considered unauthorized purchases and employees making such purchases may be subject to disciplinary action. If a vendor requires a purchase order number for purchases less than $9,000, a purchase requisition can be submitted through the District’s financial software system.

- Purchase orders begin with a purchase requisition created using the District’s financial software and require the following information:
• Purchase requisitions are initiated by each department and, if already approved in the annual budget, go through a workflow for approvals depending on the dollar amount of the requisition.
  1. Requisition entry
  2. Review and approval by Department Manager
  3. Review and approval by Finance and Business Services Manager if greater than $9,000 but less than $25,000
  4. Review and approval by General Manager if over $25,000 (purchases over $50,000 require approval from the Board of Directors before a purchase order can be generated)
  5. Return to Accounts Payable to generate a purchase order
  6. Purchase orders are distributed to the initial requestor, department manager, and a copy is emailed to the vendor. If no email address is provided it is the responsibility of the requestor to provide a copy of the purchase order to the vendor.

• The following items do not require the use of a purchase order, but are sometimes covered under a contract or agreement:
  o Annual maintenance payments
  o Annual lease payments or lease agreements
  o California Division of Drinking Water – Water Permit
  o Debt payments and administration
  o Employee benefits
  o Insurance
  o Memberships/Dues
  o Postage
  o Refunds/Rebates
  o Utility payments

• All items purchased, whether a purchase requisition is required or not, must be approved in the annual budget. Purchases not covered under an existing budget allocation must be approved through the Operating Contingency Reserve (OCR) by the Board of Directors prior to purchase.

• Splitting purchases is prohibited. Splitting purchases means the intentional separation of a District purchase or project into smaller portions to avoid any of the provisions of the procurement process, including but not limited to purchase requisition submission,
purchase requisition approval limits, quote/bid requirements, or prevailing wage requirements for public works projects.

- Blanket purchase orders must be established with vendors from whom numerous regular purchases are made which, annually, exceed the $9,000 purchase order threshold. A list of active blanket purchase orders will be maintained by Accounts Payable and reviewed by Department Managers on an annual basis for best pricing and any necessary changes in vendors.

- Changes to contract amounts or quantities ordered, regardless of dollar amount, must be submitted as a change order to the original purchase order and will be subject to the same purchase approvals as the original purchase order. Submit requests for change orders directly to Accounts Payable, do not submit a separate purchase requisition.

**Invoice Processing:**

- All invoices must be approved for payment by the Department Manager.

- When an invoice is received, the department that requested the services and/or purchased the supplies is required to check the calculations on the invoice to ensure accuracy. If the period the work was completed is not reflected on the invoice it must be noted on the document to ensure the invoice is posted to the correct fiscal period. Quantities and prices listed on the invoice are to be compared with the quantities and prices on the quote or purchase order before submitting the invoice to accounts payable for payment.

- Packing lists or bills of lading, signed and dated by the receiver with the date the goods arrived at the District, must accompany the signed invoice. The receiver should be personally knowledgeable of the delivery or receipt of the products.

- Invoices for services must be signed by an individual who can attest that the services have been satisfactorily completed.

- If the purchase did not require a purchase order, the appropriate general ledger budget account number or project account number must be noted on the invoice.

- A check request form and appropriate backup documentation are required for instances where no formal invoice is available.

**Expense Reimbursement:**

- Reasonable expenses incurred for pre-approved travel or necessary miscellaneous purchases while on District business may be reimbursed. Expenses shall be submitted to the Department Manager for approval on a signed expense report or check request form.

- Detailed receipts are required for all reimbursements through Accounts Payable.
• Reimbursement for meals is subject to the per meal limits established by the U.S. General Services Administration (GSA) Meals and Incidental Expense (M&IE) Breakdown by geographic location. Tips are excluded from the meal limits. Exceptions to GSA limits must be approved by the General Manager for a specific purpose.

• Reimbursement for tips or gratuities may not exceed 20% of the cost of the meal or service performed.

• Per diem reimbursement for meals without a receipt are processed through Payroll and are considered taxable income by the IRS.

• Refer to the Memorandum of Understanding (MOU) applicable to the employee’s job classification for more information on expense reimbursement.

**Payment Methods:**

• Checks are routinely issued for payment of outstanding invoices on Fridays. To be included in the weekly check run, invoices or check requests must be received in Accounts Payable by Tuesday of that same week. The day of the week checks are issued may be adjusted in weeks where a holiday disrupts the normal payment schedule.

• Supervisors and Department Managers may make credit card purchases ONLY when the vendor will not except a purchase order, when a documented emergency renders the purchase order process infeasible, or when payment must be made in advance, i.e. signing up for training or travel. All credit card purchases must be pre-approved by a Department Manager and the Finance and Business Services Manager or General Manager (depending on threshold for purchasing authority), regardless of the dollar amount of the purchase. All supporting documentation for the purchase shall be forwarded to Accounts Payable, noting the date the credit card purchase was made.

**Petty Cash:**

• Expenses $50 or less incurred by employees for District purposes may be reimbursed from Petty Cash. All expenses must include a receipt and be approved by the Department Manager before submission for reimbursement.

Micro-Purchases ($\leq 9,000$) (2 CFR §200.320[a]):

- Procurement by micro-purchase is the acquisition of supplies or services, the aggregate dollar amount of which does not exceed the micro-purchase threshold as set by the Federal Acquisition Regulation at 48 CFR Subpart 2.1 and adjusted periodically for inflation.
- To the extent practicable, the District must distribute micro-purchases equitably among qualified suppliers.
- Micro-purchases may be awarded without a purchase order and without soliciting competitive quotations if the expenditure is approved in the annual budget and the District considers the price to be reasonable.
- As of the date of this policy, the federal micro-purchase threshold is $10,000. The District has adopted a lower threshold for micro-purchases of $9,000, which is allowed under Uniform Guidance.
- Exceptions to the micro-purchase threshold include items not included in the annual budget.
- Public works projects that qualify as micro-purchases may still be subject to wage rate requirements established by the California Department of Industrial Relations (DIR) or, in the case of federally funded construction projects, the Davis-Bacon Act (see section on Public Works Projects and Federal Funding Requirements).
- Purchased materials, supplies, components or chemicals that will be in contact with drinking water must be NSF 60/61 certified.

Small Purchases ($\leq 150,000$) (2 CFR §200.320[b]):

- Small purchase procedures are those relatively simple and informal procurement methods for securing services, supplies or other property that do not cost more than the simplified acquisition threshold as set by the Federal Acquisition Regulation at 48 CFR Subpart 2.1 and periodically adjusted for inflation.
- Small purchases require submission of a purchase requisition through the District’s financial software system.
• If small purchase procedures are used, price or rate quotations shall be obtained from at least three (3) qualified sources, evidence of which must be submitted with the purchase requisition. Exceptions include items where there is clearly and legitimately only one or two sources capable of supplying the item, or in the event of a documented emergency.

• As of the date of this policy, the federal simplified acquisition threshold is $250,000; however, to maintain effective internal controls and mitigate audit risk the District has adopted a lower small purchase threshold of $150,000 for purchases already approved in the annual budget.

• For purchases exceeding the General Manager’s purchase authority of fifty thousand ($50,000), Board of Director’s approval is required before a purchase order will be issued.

• Purchased of materials, supplies, components or chemicals that will be in contact with drinking water must be NSF 60/61 certified and a certification form must accompany the purchase requisition.

Sealed Bids (> $150,000) (2 CFR §200.320[c]):

Competitive sealed bids are publicly solicited and a firm fixed-price contract is awarded to the responsible bidder whose bid, conforming to all the material terms and conditions of the Invitation for Bids (IFB), is the lowest in price. Upon obtaining bids, purchases must be approved by the Board of Directors prior to issuing a purchase order. Purchases of materials, supplies, components or chemicals that will be in contact with drinking water must be NSF 60/61 certified and a certification form must accompany the purchase requisition.

According to 2 CFR §200.320(c)(1), this method is appropriate when the following conditions exist:

1. A complete, adequate and realistic specification or purchase description is available, which can exist for some construction projects, vehicle or inventory purchases.

2. Two or more responsible bidders are willing and able to compete effectively for the business.

3. The procurement lends itself to a firm fixed-price contract (lump sum or unit) and the selection of the successful bidder can be made principally on the basis of price.

If the sealed bid method is used, the following conditions, as set down in 2 CFR §200.320(c)(2) apply:

1. The Invitation for Bids (IFB) must be publicly advertised.

2. Bids must be solicited from an adequate number of known suppliers, and bidders must be provided a sufficient response time prior to the date set for opening bids.

3. The IFB, which will include any specifications and pertinent attachments, must define the items or services in order for the bidder to properly respond.
4. All bids will be publicly opened at the time and place prescribed in the IFB.

5. A firm fixed-price contract award will be made in writing to the lowest responsive and responsible bidder. Where specified in bidding documents, factors such as discounts, transportation cost and life cycle costs shall be considered in determining which bid is lowest. Payment discounts will only be used to determine the low bid when prior experience indicates that such discounts are usually employed.

6. Any and all bids may be rejected if there is a sound documented reason.

**Competitive Proposals (> $150,000) (2 CFR §200.320[d]):**

This procurement method requires formal solicitation, includes fixed-price or cost-reimbursement contracts, and is used when sealed bids are not appropriate. The solicitation will usually include evaluative factors other than price and these factors should be spelled out in the solicitation document, as well as how the factors will be weighted in final consideration of bids.

If this method is used, the following requirements apply:

1. Requests for Proposals (RFP) must be publicized and identify all evaluation factors and their relative importance.

2. Proposals must be solicited from an adequate number of qualified sources so as to ensure competition.

3. The methods for conducting technical evaluations of the proposals received and for selecting recipients may include, but are not limited to, oral interviews, reference checks, past performance, availability to perform work, and appropriate certifications as determined by project scope.

4. Written procedures are required for all RFP technical evaluations and must be retained in the event of a single audit.

5. Any response that takes exception to any mandatory items in this proposal process may be rejected and not considered.

6. Contracts must be awarded to the responsible firm whose proposal is most advantageous to the District, with price and other qualitative factors considered.

A review and selection committee may be appointed to evaluate and rank the proposals and may be comprised as follows:

- The committee may include the General Manager or management designee, appropriate staff members, qualified members from another agency, or qualified and unbiased members of the professional discipline being considered.

- Board member(s) may participate if so authorized at the time of RFP approval.
The number of committee members and consultants to be interviewed shall be at the General Manager’s discretion unless the Board provides specific direction.

**Architectural and Engineering Services**

Competitive proposal procedures must be used for qualifications-based procurement of architectural, landscape architectural, engineering, environmental, land surveying, and construction management services (collectively “A/E” professional services) whereby competitors’ qualifications are evaluated through a Request for Qualifications (RFQ) and the most qualified competitor is selected, subject to negotiation of fair and reasonable compensation. This qualification method, where price cannot be used as a selection factor, can only be used in procurement of A/E professional services. It cannot be used to purchase other types of services, even when A/E firms are a potential source to perform the proposed service.

**Intergovernmental Contracts**

The District has determined that contracts with other governmental agencies can be excluded from the competitive bidding/proposal requirements.

**Inventory Purchases**

Inventory purchases must be made through a pre-qualified supplier with the exception of sole source inventory items such as hydrants or meters. Pre-qualified suppliers are those who have submitted a competitive price quote on 100 of the most frequently purchased inventory items and agree to honor that pricing for a minimum of one year, unless extenuating circumstances arise. Pre-qualified suppliers will be reviewed annually by the Storekeeper and approved by the Operations and Maintenance Manager. Inventory orders, regardless of price, require a purchase requisition in order to receive items in the inventory system.

**Noncompetitive Negotiation (2 CFR §200.320[f]):**

Also known as sole-source procurement, this procurement method may be appropriate only when one or more of the following criteria are met:

- The item is available only from a single source. The District must document why the individual or firm it has selected has the unique capability required and documentation must be retained for audit purposes.

- The General Manager deems an emergency exists and determines that the public health, safety or welfare of the community would be affected if the normal solicitation procedures were followed. All emergency purchases which would otherwise require formal solicitation must be submitted to the Board of Directors for ratification at the next regular Board meeting after purchase is authorized.

- In the event federal funding is utilized, the federal awarding agency or pass-through entity expressly authorizes noncompetitive proposals in response to a written request from the District.

- After solicitation of a number of sources, competition is deemed inadequate and no other recourse for procurement is available.
Time and Materials Contracts (2 CFR §200.318[j]):

A time and materials contract may not be used for a federally funded procurement unless 1) the contract includes a not-to-exceed price that the contractor exceeds at its own risk; and 2) the Board has determined that no other type of contract is suitable and the reasons for unsuitability are well documented. A time and materials type contract refers to a contract whose cost is the sum of the actual cost of materials plus direct labor hours charged at a fixed hourly rate that include wages, administrative expenses and profit. Because the contract price is likely open-ended, this type of contract provides no positive profit incentive for cost control or labor efficiency. A higher degree of oversight is required in order to obtain reasonable assurance that the contractor is using efficient methods and effective cost controls.

Contract Cost and Price (> $150,000) (2 CFR §200.323):

A price analysis is the process of comparing total price among comparable offers, whereas a cost analysis is the process of reviewing individual elements of cost that make up the overall price. If it is requested that costs are broken out in the submission of bid or proposal, each of the elements must be analyzed to determine whether it is fair, reasonable and beneficial to the overall deliverable. As part of the selection process, some form of cost or price analysis must be performed and documented in connection with every procurement in excess of the District's small purchase threshold ($150,000), including contract modifications.

- The method and degree of analysis is dependent on the facts surrounding the particular procurement situation, but as a starting point, independent estimates shall be made prior to receiving bids and proposals.

- For federally funded contracts, profit shall be negotiated as a separate element of the price for each contract in which there is no price competition and in all cases where cost analysis is performed. To establish a fair and reasonable profit, consideration must be given to the complexity of the work to be performed, the risk borne by the contractor, the contractor’s investment, the amount of subcontracting, the quality of its record of past performance, and industry profit rates in the surrounding geographical area for similar work.

- Costs or prices based on estimated costs for contracts under the federal award are allowable only to the extent that costs incurred or cost estimates included in negotiated prices would be allowable for the District under Subpart E- Cost Principles of Part 200-Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards.

- The cost plus a percentage of cost and percentage of construction cost methods of contracting must not be used.

Contract Change Orders:

The General Manager is authorized to execute contract change orders (CCO) for projects in progress within the following guidelines:
• The total of all CCO’s may not exceed the amount approved in the budget or amended by the Board for the project

• Each CCO must be within the Board authorized scope of work for the contract. Out-of-scope (supplemental agreements) must be separately bid or separately authorized by the Board of Directors

• Projects must be in construction, defined as the time period between Notice to Proceed and final completion/beneficial occupancy

• The General Manager shall report to the Board, on the next available agenda, all CCO’s executed under this authority

CONTRACTING

General Services:

The purchase of general services (other than professional services, as defined below) under a service contract or agreement requires two signatures (Department Manager and Finance/General Manager) and may not exceed a two-year term.

Professional Services:

Professional services are those services requiring a high degree of professional, educational or technical skill such as services rendered by architects, landscape architects, engineers, environmental engineers, environmental planners, surveyors, construction managers, economists, bond counsel, bond underwriters, financial advisors, appraisers, actuaries, attorneys, auditors, software service providers, web designers, and others. Professional services may be procured for three-year contracts, with an option to extend into one or two additional years as long as contract performance is satisfactory and pricing remains competitive. Longer contracts preclude competitive procurement standards and are discouraged on that basis. Professional services associated with a public works project may be approved for a multi-year contract that coincides with the term of the project at the discretion of the Board of Directors. In instances where a shorter term contract could result in significant disruption of District operations, such as legal services or information/communication technology services, the District may approve an extended contract.

The General Manager or management designee is authorized to negotiate a contract detailing scope of work and fair and reasonable compensation with the firm whose competitive proposal ranked highest during the evaluative process. If the District is unable to negotiate a satisfactory contract with the highest ranked firm, negotiations may be formally terminated and the firm dismissed from further consideration. Negotiations may continue with subsequently ranked firms until an agreement is reached. The substance of previous negotiations will not be divulged by District staff in discussions with subsequently ranked firms, and the submittals of unsuccessful candidates will be considered confidential. If no agreement is reached the District may consider republicizing the procurement. Choosing less than qualified consultants is not in the public interest and not consistent with the obligation of the District to protect the health, safety and welfare of the public.
When engaging professional services for a federally funded non-construction project, provision 2 CFR §200.308[c][1][vi] states, “Unless described in the application and funded in the approved federal awards, the subawarding, transferring or contracting out of any work under a federal award” requires prior approval from the granting agency.

PUBLIC WORKS PROJECTS

Prevailing Wage Requirements:

Public works projects are defined, for prevailing wage purposes, in California Labor Code Section 1720 to include construction (including design, inspection or surveying), alteration, demolition, installation, or repair, paid for in whole or in part out of public funds. No contractors or subcontractors may be awarded a contract for a public works project unless registered with the California Department of Industrial Relations’ Public Works Contractor Registration Program.

District Responsibilities:

1. Register project with the Department of Industrial Relations (DIR) by filing a PWC-100 form within 5 days of the award of the contract (failure to provide timely submission can jeopardize state funding)
2. Obtain prevailing wage rates from DIR
3. Notify potential contractors that they must register with DIR prior to bidding
4. Certify proof of contractor registration before awarding bid
5. Require contractors to post jobsite notices on public works requirements
6. Ensure contractor is paying prevailing wages in compliance with public works laws
7. Report any suspected violations to the Labor Commissioner

Contractor Responsibilities:

1. Register with the Department of Industrial Relations (DIR) as a public works contractor
2. Pay prevailing wages on any project over $1,000
3. Follow apprenticeship requirements for any project over $30,000
4. Maintain and submit certified payroll records

A small project exemption exists for maintenance projects that do not exceed $15,000 or new construction, demolition, alteration or repair projects that are less than $25,000. Contractors who work exclusively on small projects that qualify for exemption are not required to register as a public works contractor or file electronic certified payroll reports but are still required to maintain certified payroll records and provide them to the Labor Commissioner’s office and the District on request. The District does not need to file a PWC-100 form for exempt projects.

Surety (Bonding) Requirements:

For public works construction contracts or subcontracts the District has established the following sureties:
1. A bid guarantee from each bidder equivalent to ten percent (10%) of the bid price. The bid guarantee must consist of a firm commitment such as a bid bond, certified check, or other negotiable instrument accompanying a bid as assurance that the bidder will, upon acceptance of the bid, execute such contractual documents as may be required within the time specified.

2. A faithful performance bond on the part of the contractor for no less than 100 percent (100%) of the contract amount. A performance bond is one executed in connection with a contract to secure fulfillment of all the contractor's obligations under such contract.

3. Required for contracts and subcontracts exceeding $25,000: A payment bond on the part of the contractor for no less than 100 percent (100%) of the contract amount. A payment bond is one executed in connection with a contract to assure payment as required by law of all persons supplying labor and material in the execution of the work provided for in the contract. The District must approve the bond before work begins and is not allowed to release payment to the contractor without an approved payment bond. This threshold is less than the District’s threshold for sealed bids or competitive proposals but exceeds the threshold for small purchases requiring competitive pricing. A design professional is not considered a direct contractor in this instance and is therefore exempt from the bond requirement.

4. A maintenance bond on the part of the contractor for no less than ten percent (10%) of the contract amount or $2,000, whichever is greater, to remain in effect for a minimum of two years after the completion and acceptance of work performed under the contract. A maintenance bond protects the District against defects and faults in materials, workmanship, and design.

Federally funded contracts exceeding $250,000 require, at a minimum, the bonding requirements listed under items 1, 2, and 3 (2 CFR §200.325).

**Alternative Project Delivery Methods:**

The Board may authorize the use of alternative methods of procurement of public works projects in excess of $1 million, including, without limitation, the design-build approach, subject to all applicable laws and requirements. The solicitation of projects utilizing alternative methods of procurement requires a competitive process, which may include award based on sealed bid or competitive proposal. District staff, contractors and consultants involved in design-build projects are subject to the District’s conflict of interest policy for design-build projects (attached as Appendix A).
FEDERAL FUNDING REQUIREMENTS

All contracts using federal funding shall comply with the following provisions as applicable:

1. Contracts for more than the federally mandated simplified acquisition threshold (currently set at $250,000), must address administrative, contractual, or legal remedies in instances where contractors violate or breach contract terms, and provide for such sanctions and penalties as appropriate.

2. All contracts in excess of $10,000 must address termination for cause and for convenience by the District including the manner by which it will be effected and the basis for settlement.

4. Davis-Bacon Act: Construction contracts in excess of $2,000 shall include a provision for compliance with the Davis-Bacon Act (40 U.S.C. 3141-3144, and 3146-3148). Contractors must be required to pay laborers and mechanics wages not less than the prevailing wage as determined by the Secretary of Labor and must be required to pay wages not less than once a week. Each bid solicitation published by the District must contain the current prevailing wage determination. Any award of the contract must be conditioned on contractor’s acceptance of that wage determination and suspected or reported violations of this act shall be immediately reported to the Federal awarding agency. [Projects controlled by the District must comply with State of California Department of Industrial Relations (DIR) requirements, including contractor and project registration, certified payroll reporting, and payment of California’s prevailing wage rates, if they exceed corresponding Davis-Bacon rates, regardless of federal funding provisions].

5. Copeland “Anti-Kickback” Act: Applies to construction contracts in excess of $2,000. It prohibits kickbacks in construction contracts funded with Federal monies. Contractors and subcontractors or subrecipients shall be prohibited from inducing any person employed in the construction, completion, or repair of public work, to give up any part of the compensation to which he or she is otherwise entitled and suspected or reported violations shall be immediately reported to the Federal awarding agency.

6. Contract Work Hours and Safety Standards Act (40 U.S.C. 3701-3708): Where applicable, all contracts awarded by the District in excess of $2,000 for construction contracts and in excess of $2,500 for other contracts that involve the employment of mechanics or laborers shall include a provision for compliance with sections 102 and 107 of the Contract Work Hours and Safety Standards Act (40 USC §§327-333), as supplemented by the Department of Labor regulations (29 CFR Part 5). Under §102 of the act, each contractor shall be
required to compute the wages of every mechanic and laborer on the basis of a standard work week of 40 hours. Work in excess of the standard work week is permissible provided that the worker is compensated at a rate of not less than 1-1/2 times the basic rate of pay for all hours worked in excess of 40 hours in the work week. Section 107 of the act is applicable to construction work and provides that no laborer or mechanic shall be required to work in surroundings or under working conditions that are unsanitary, hazardous or dangerous. These requirements do not apply to the purchases of supplies, material or articles ordinarily available on the open market or to contracts for transportation or transmission of intelligence.

7. **Rights to Inventions Made Under a Contract or Agreement:** If the federal award meets the definition of “funding agreement” under 37 CFR §401.2 (a) and the recipient or subrecipient wishes to enter into a contract with a small business firm or nonprofit organization regarding the substitution of parties, assignment or performance of experimental, developmental, or research work under that “funding agreement,” the recipient or subrecipient must comply with the requirements of 37 CFR Part 401, “Rights to Inventions Made by Nonprofit Organizations and Small Business Firms Under Government Grants, Contracts and Cooperative Agreements.”

8. **Clean Air Act & Federal Water Pollution Control Act:** Contracts and sub grants in excess of $150,000 must contain a provision that requires the recipient to agree to comply with all applicable standards, orders or regulations issued pursuant to the Clean Air Act and the Federal Water Pollution Control Act, as amended. Suspected or reported violations must be reported to the federal awarding agency and the regional office of the Environmental Protection Agency (EPA).

9. **Energy Policy and Conservation Act:** Mandatory standards and policies relating to energy efficiency that are contained in a state energy conservation plan issued in compliance with the Energy Policy and Conservation Act must be followed as appropriate.

10. **Debarment and Suspension:** A contract award must not be made to parties listed on the System for Award Management’s (SAM) “List of Parties Excluded from Federal Procurement or Non-Procurement Programs,” in accordance with the OMB guidelines at 2 CFR 180 that implement Executive Orders 12549 and 12689 “Debarment and Suspension.” SAM exclusions contain the names of parties debarred, suspended, or otherwise excluded by agencies, as well as parties declared ineligible under statutory or regulatory authority other than Executive Order 12549.

11. **Byrd Anti-Lobbying Amendment:** Contractors that apply or bid for an award of $100,000 or more must certify that they will not and have not used federal funds to pay any person or organization for influencing or attempting to influence an officer or employee of any agency, a member of Congress, officer or employee of Congress, or an employee of a member of Congress in connection with obtaining any federal contract, grant or any other award. Contractors must also disclose any lobbying with non-federal funds that takes place in connection with obtaining any federal award.

12. **Procurement of Recovered Materials (2 CFR §200.322):** A non-federal entity that is a state agency, or agency of a political subdivision of a state, and its contractors must comply with Section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act. The requirements of Section 6002 include procuring only items designated in
the guidelines of the EPA at 40 CFR part 247 that contain the highest percentage of recovered materials practicable, consistent with maintaining a satisfactory level of competition, where the purchase of the items exceeds $10,000 or the value of the quantity acquired during the preceding fiscal year exceeded $10,000. Other requirements include procuring solid waste management services in a manner that maximizes energy and resource recovery and establishing an affirmative procurement program for procurement of recovered materials identified in the EPA guidelines.

Federal Awarding Agency or Pass-Through Entity Review (>$250,000) (2 CFR §200.324):

1. The District shall make available, upon request of the federal awarding agency or pass-through entity, technical specifications on proposed procurements where the federal awarding agency or pass-through entity believes such review is needed to ensure that the item or service specified is the one being proposed for acquisition. This review generally will take place prior to the time the specification is incorporated into a solicitation document. However, if the District desires to have the review accomplished after a solicitation has been developed, the federal awarding agency or pass-through entity may still review the specifications, with such review usually limited to the technical aspects of the proposed purchase.

2. The District will make available upon request, for the federal awarding agency or pass-through entity pre-procurement review, procurement documents, such as requests for proposals or invitations for bids, or independent cost estimates, when:
   
   a. Procurement procedures or operations fails to comply with the procurement standards in this part
   
   b. The procurement is expected to exceed the simplified acquisition threshold ($250,000) and is to be awarded without competition or only one bid or offer is received in response to a solicitation
   
   c. The procurement, which is expected to exceed the simplified acquisition threshold, specifies a “brand name” product
   
   d. The proposed contract is more than the simplified acquisition threshold and is to be awarded to other than the apparent low bidder under a sealed bid procurement
   
   e. A proposed contract modification changes the scope of a contract or increases the contract amount by more than the simplified acquisition threshold

3. The District is exempt from the pre-procurement review in item 2 of this section if the federal awarding agency or pass-through entity determines that its procurement systems comply with the standards of this part.

4. The District may request that its procurement system be reviewed by the federal awarding agency or pass-through entity to determine whether its system meets these standards in order for its system to be certified. Generally, these reviews must occur where there is continuous high-dollar funding, and third-party contracts are awarded on a regular basis.
5. The District may self-certify its procurement system. Such self-certification must not limit the federal awarding agency's right to survey the system. Under a self-certification procedure, the federal awarding agency may rely on written assurances from the District that it is complying with these standards. The District must cite specific policies, procedures, regulations, or standards as being in compliance with these requirements and have its system available for review.

All necessary affirmative steps will be taken to assure that minority business, women's business enterprises, and labor surplus area firms are used when possible.

Affirmative steps include:

- Placing qualified small and minority businesses and women's business enterprises on solicitation lists
- Assuring that small and minority businesses and women's business enterprises are solicited whenever they are potential sources
- Dividing total requirements, when economically feasible, into smaller tasks or quantities to permit maximum participation by small and minority businesses and women's business enterprises
- Establishing delivery schedules, where the requirement permits, which encourage participation by small and minority businesses and women's business enterprises
- Using the services and assistance, as appropriate, of such organizations as the Small Business Administration and the Minority Business Development Agency of the Department of Commerce
- Requiring the prime contractor, if subcontracts are to be let, to take the affirmative steps listed in paragraphs (1) through (5) of this section
Organizational Conflict of Interest Policy for Design-Build Projects

PURPOSE
This policy establishes the organizational conflict of interest guidelines applicable to design-build projects.

APPLICABILITY
This policy applies to all persons or entities that have entered into or wish to enter into contracts with the Soquel Creek Water District ("District") to perform design–build work.

POLICY
Persons or entities participating as proposers ("Proposers;") on a design-build project or joining a design-build team may not have an organizational conflict of interest.

Organizational conflicts of interest are created by circumstances arising out of prospective Proposers’ existing or past activities, business or financial interests, familial relationships, contractual relationships, or organizational structure (e.g., parent entities, subsidiaries, affiliates) that result in (i) impairment or potential impairment of consultants’ or contractors’ ability to render impartial assistance or advice to the District or of their objectivity in performing work for the District, (ii) an unfair competitive advantage for any bidder or Proposer with respect to the District’s procurement, or (iii) a perception or appearance of impropriety with respect to any of the District’s procurements or contracts or perception or appearance of unfair competitive advantage with respect to a procurement by the District (irrespective of whether such perception is accurate).

This Policy neither purports to address every situation that may arise in the context of the District’s procurements and contracts, nor to mandate a particular decision or determination by the District. The District retains the ultimate and sole discretion to determine, on a case by case basis, whether an organizational conflict of interest may exist in the following instances:

a. A Proposer is the District’s general engineering or architectural consultant for the design-build project, or a subconsultant for the District’s general engineering or architectural consultant that has already provided services for the design-build project.

b. A Proposer has assisted or is assisting the District in the management of the design-build project, including the preparation of the request for proposals, evaluation criteria, or any other aspect of the procurement.

c. A Proposer has conducted preliminary design services for the design-build project such as conceptual layouts, preliminary design, or preparation of bridging documents.

d. A Proposer performed design work related to the design-build project for other stakeholders in the design-build project.

e. A Proposer performed design work on a previous contract that specifically excludes the Proposer from participating as a Proposer or joining any design-build team for the design-build project.
f. A Proposer is under contract with any other entity or stakeholder to perform oversight of the design-build project.

g. Any circumstances that would violate California Government Code Section 1090, *et seq*.

The District may be required to comply with requirements and regulations applicable to federally funded procurements and contracts. Nothing in this Policy is intended to limit, modify or otherwise alter the effect of other relevant federal, state, or local regulations, statutes or rules.

Persons or entities responsible for preparing documents under the California Environmental Quality Act ("CEQA") are required to comply with all state laws and regulations applicable to such services, including requirements relating to organizational conflicts of interest. For federally funded projects subject to NEPA compliance, persons or entities involved in the preparation of an Environmental Impact Statement (EIS) must disclose whether or not they have a financial or other interest in the outcome of the project. A person or entity involved in the preparation of an EIS may not propose on work connected with the project before the EIS is completed. (See 40 CFR 1506.5(c).)

**Proposers' Obligations**
Proposers having a conflict must immediately make a full written disclosure of the conflict to the District's General Manager, or management designee, and shall have a continuing obligation to do so until they are no longer Proposers.

If a Proposer determines that a potential conflict of interest exists, the Proposer's disclosure will not necessarily disqualify the Proposer from being awarded a contract. The Proposer must submit proposed measures to avoid, neutralize, or mitigate all potential or actual conflicts. The District, at its sole discretion, will determine whether an organizational conflict of interest exists and whether the proposed measures are sufficient to overcome the conflict or potential conflict and whether the Proposer may continue with the procurement process.

**Obligations After Contract Award**
The successful Proposer to whom the contract is awarded ("Design-Builder") has an ongoing obligation to monitor and disclose conflicts or potential conflicts of interest. The District has the right to ongoing enforcement of this policy. If an organizational conflict of interest is discovered after the contract has been awarded, the Design-Builder must make an immediate and full written disclosure to the District that includes a description of the action that the Design-Builder has taken or proposes to take to avoid or mitigate the conflict. If an organizational conflict of interest is determined to exist and the Design-Builder was aware of the organizational conflict of interest prior to award of the contract and did not disclose the conflict, the District may terminate the contract. If a conflict of interest arises after the contract award and the Design-Builder's proposed measures to avoid or mitigate the conflict are determined by the District to be inadequate to protect the District, the District may terminate the contract. If the contract is terminated, the District assumes no obligation, responsibility or liability to reimburse all or part of the costs incurred or alleged to have been incurred by the Design-Builder, and the District shall be entitled to pursue any and all appropriate legal remedies.

**Incorporation by Reference**
This policy shall be incorporated by reference into all design-build contracts executed by the District.
